Drexel SL120

**Landoll Corporation**, which celebrated its 40th anniversary in December 2003, is located in Marysville KS and is a diverse manufacturer of products for the Material Handling, Transportation, Agriculture and specialty Government markets. The Material Handling Division manufactures forklifts that operate in aisles as narrow as 56" with lift heights to 30' and capacities from 2,500 to 12,000 lbs. The Narrow Aisle Forklifts include the original and popular Bendi 180( articulating front wheel steer, rear wheel drive electric and LP Gas powered trucks. In April 2003 Landoll acquired the Drexel Product Line and is now manufacturing the highly reputable SwingMast line of trucks. Both the Bendi and Drexel SwingMast forklifts provide maximum utilization of storage space by reducing aisle sizes while still performing all the jobs of a front loading forklift. This includes loading and unloading trailers, going from the dock to the rack without staging, climbing ramps and working in a variety of applications. With the acquisition of the Drexel Line Landoll Corp. now provides a wider range of solutions to those customers wanting to minimize storage aisle sizes, and maximize productivity and equipment utilization. Innovate new designs and continuous product improvements keep Landoll in its position as a leading provider of these narrow aisle forklifts. Landoll distributes and supports its forklift line through over 100 independent dealers worldwide.
